

ZEN CONTAINERISED INDOOR SHOOTING RANGE (Zen CISR)

Built into a standard 40 foot shipping container for easy portability, the Zen CISR is a 'plug and play' kind of shooting range for live fire of hand guns and rifles.

The CISR is ideal for small arms training for tactical and anti-terrorist operations. CISR comprises a safe stop-butt for the caliber of weapons fired. The CISR helps alleviate challenges to small arms training such as availability of firing ranges, manpower, time to train, logistics & cost of outdoor ranges.

CISR thus helps in achieving and maintaining the 'shooting fitness' of soldiers and units.

Ammunition that can be fired – 9mm, 5.56mm, 7.62mm and equivalent.

The target is projected on to a self-sealing rubber membrane. Targets maybe any picture or video, computer generated scenario, snap target or static range target as per the practice. User created videos can also be authored within minutes and included in an exercise for training on real life scenarios and for anti-terrorist training.

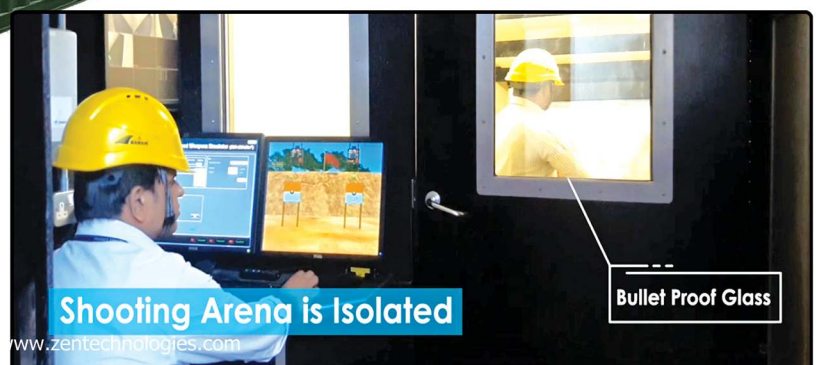

The hit is instantly recorded and displayed on the firing point display panel and at the control station.

The sensor target screen caters for both sub-sonic and super sonic bullets.

An OSHA/NIOSH compliant ventilation system ensures air quality.

The CISR control station comprises a detailed analytical software that delivers recording, monitoring, scoring, analysis and correction/guidance.

The CISR has a very low outside acoustic signature and therefore can be placed right at the point of need even in dense urban/office environment.

CONTAINERISED INDOOR SHOOTING RANGE (CISR)

Portable Container Ranges can be installed right at the point of need itself
